

Up to **1350 CFM** and **350 PSI**

Proven Performance...The Complete Line of Vanair® Drill Modules

Vanair's powerful, and versatile drill module line provides big air of up to 1350 CFM and 350 PSI. Robustly engineered and field tested, a Vanair® system will meet your challenge day after day.

*For other deliveries, pressure and speeds, please consult factory. The horsepower figures represent nominal BHP needed at the input shaft and additional hydraulic power is needed for the hydraulic fan modules. Consult factory for flows and pressure for hydraulic fan requirements. Modules do not include drive system. All modules include a separate receiver tank with a minimum pressure and relief valve.

Product improvement is a continuing goal. Design and specifications are subject to change without notice or obligation.
